SAVORING
ART DE VIVRE

ART DE VIVRE IN HARMONY

We are yacht builders, creators of dreams.

INTRODUCTION

We are honored to introduce you to the M-Line product range, the latest addition to the well-established family of PRESTIGE motor yachts. Created in the same PRESTIGE spirit of enabling people to savor precious moments at sea, the M-Line invites those looking for a quieter lifestyle to reconnect with nature and with themselves. Rich in space and light, using refined materials and engineered to the highest standards, these multi-hull-based yachts offer open, inviting spaces with the best views of the expanse and with unmatched comfort and connectivity with the water in pursuit of internal harmony.

The PRESTIGE Team

“ We are entering a new era where we will be a reference in the market. ”

Camillo GARRONI

PRESTIGE has always prioritized volume, comfort, bright interiors and innovative layouts in the design and creation of motor yachts for its customers.

The design of this new range of multihull motoryachts, by Garroni Design, enters a new world in stability and in the distribution of space on board, while remaining true to the heritage of PRESTIGE.

“ The M8 was designed for a clientele that is looking for volume, refined luxury, and exceptional performance. I worked on the hull of the M8 with this in mind, and the result is very different from what we find on the market today. ”

Marc LOMBARD

At sea, the comfort and well-being of the people on board are essential for PRESTIGE. Two hulls, rather than one, ensure natural stability without the need for stabilization.

The twin hulls' seaworthiness is, owing to a center of gravity that is particularly well considered, irreproachable, even in heavy seas. The roll reduction is remarkable, both at anchor and under way and this is true at any speed.

THE MULTIHULL BY PRESTIGE: SMOOTH, EFFICIENT DESIGN

New dimensions in comfort

PRESTIGE has created a revolutionary new multihull platform for unrivaled space onboard. By extending the motor yacht's architecture to two hulls, you benefit from 20% more space on board than on a traditional monohull of equal length.

Multihull architecture by PRESTIGE results in optimized interior volumes, refined comfort, space and light, the sensation of proximity with the sea, and ultimately, of connection with nature and with yourself.

Stability for serenity

Whether cruising or at anchor, M-line two hulls demonstrate remarkable stability and safety: all exterior living areas – cockpit, foredeck, and flybridge – afford exceptional comfort. Optimized interior volumes in the saloon and cabins create a spacious, luxurious atmosphere. Enjoy smooth, serene cruising aboard your M-Line yacht, where the sea feels like home.

The benefits of a gentle pace

PRESTIGE M-Line guarantees optimal fuel efficiency, thanks to the multihull design. It is 30% more efficient than a monohull of equal length. The architecture of the M-Line offers a less expensive and more environmentally friendly experience. M-line yachts are adapted to a gentler, peaceful way of life, in harmony with your environment.

Harmony with the sea

Experience cruising in harmony, the M-Line offers true proximity with the sea, with multiple, easily accessible exterior living areas. Remarkable on the interior, as well, the saloon features large windows and sliding glass doors, providing a panoramic view of the landscape and the sea.

NATURAL QUALITY FINISH

The streamlined contemporary design, the quality of materials, and the fit and finish on board all contribute to an experience of pure connection with the sea. Experienced designers and high-end partners offer a refined atmosphere on board focusing on environmental sustainability.

R O D A

CONSCIOUS YACHTING

At every step in the process of product design, development, construction, and throughout the organization we are committed to reducing the environmental footprint of our yachts so that our customers can enjoy cruising in closer harmony with nature.

The brand follows the Groupe Beneteau action plan, targeting a significant increase in the use of local and bio-sourced materials, as well as lower energy consumption.

FUEL EFFICIENCY

Thanks to the multihull architecture, PRESTIGE M-Line guarantees optimal fuel efficiency. Moreover it offers more living space on board, making these models comparable with traditional monohull of greater length.

In terms of consumptions, the M-Line brings a saving of 25% consumptions at 17kn and 40% less consumptions at 21kn compared to traditional monohull of equal living space offered on board.

SILENT MODE:

As an option, the Silent MODE Pack integrates a large surface area of solar panels and a substantial lithium battery bank. This allows to run the yacht for 10 hours at night or 2 hours during the day without the generator running, offering an incredible comfort with no noise pollution, no vibration and no direct CO₂ emissions.

M8

In ultimate harmony with the sea

Discover new horizons and reconnect nature, with yourself, and with others in a spacious, refined, luxurious environment: this is the Art de Vivre offered by the new M8.
